SKILLS

Solidworks

Matlab

Python

Arduino/Raspberry Pi

Linux OS

C/C++

OpenCV

ROS

Hardware Prototyping

EDUCATION

**Bachelor of Applied Science,
Mechanical Engineering**

University of Toronto 2018-2022

Cumulative GPA: 3.37

Robotics & Mechatronics Minor

University of Toronto 2018-2022

**Certified Solidworks Professional
(CSWP)**

University of Toronto 2019

Basic Machining Certification

George Brown College 2019

EXPERIENCE

University of Toronto Designathon 2020

- 1st place award for successful prototyping and presentation of automated package delivery security system
- Combined knowledge of SolidWorks, 3D printing, Arduino, circuiting and UI/UX design to create a digital and physical model

University of Toronto Engineering Competition 2020

- 1st place in the Junior Design Competition at the university level and proceeded to compete in the provincial finals
- Produced and tested a functioning prototype of a construction material transportation system for high-rise buildings using household materials

Technical Lead of CNC Mill Design Project

University of Toronto, Toronto, Canada 09/19-12/19

- Top 3 in class competition for the CNC mill design and earned a 95% grade
- Led the development of the mechanical systems of a custom CNC mill and their SolidWorks Assembly within my team of six

Human Powered Vehicle Team-Fairing Division

University of Toronto, Toronto, Canada 09/19-present

- Designing and constructing fairing for vehicle to compete in the ASME International Competition
- Testing the feasibility of Solidworks designs through dynamic simulations

Aircraft Stringer Material Testing

University of Toronto, Toronto, Canada Jan. 2020-Mar. 2020

- Performed 4 experiments evaluating the strength and modes of failure of an aircraft component in a hands-on laboratory setting
- Evaluated results and developed extensive reports discussing the specific properties and weaknesses of the chosen component
